

Regulations of the FEM1 Laboratory

1. Attendance at all four meetings
2. At meetings 2, 3 and 4 we will solve three tasks on our own:
 - Plate with notches (2D task)
 - Pressure vessel (3D task)
 - Plate and thin walled beam modeled with shell elements
3. At each meeting we prepare a simplified report on a given task
4. After the last meeting we email a full report of one selected topic
5. At the last meeting, we will write a short test on the content of the meetings and the exercises performed
6. The final mark is the result of the full report and the test
